PROACTIVE REVENUE · IN-PERSON WORKSHOP

AI Automation Workshop

for the "Joe Shmo"

Build your own fleet of AI agents for personal or business use.

Three hours, in person at your community center. Every principle of building your own AI fleet, demonstrated live on the big screen in plain language. No tech background needed, never boring.

Understand what AI agents are, and what they can do today

Build an AI fleet, live on the big screen

Keep using it with a simple method that lasts

THE PROBLEM

Everyone can tell AI is changing their work. Few know where to start.

Too much hype
Big promises, scary headlines and tools that change every week.
e.g. social feeds, viral demos

↔

Too technical
Courses written for engineers, full of jargon and code.
e.g. developer tutorials

- What can AI actually do for me today?
- Is it safe to use with my information?
- How do I make it part of my week?

THE WORKSHOP

Three in-person hours that replace confusion with clarity.

Plain language, live on screen
Tal builds everything live on one computer, streamed to the big screen. No jargon.

At least five use cases each
Every participant leaves with five or more practical ways to use AI in their own life.

Enjoyable, not a lecture
Lively, with real examples and plenty of time for questions.

Safe, responsible use
How to check AI output and protect personal information.

Taught by someone who builds AI agents for a living.

HOW IT WORKS

1 Understand
What an AI agent is, how it differs from a chatbot, and what agents can reliably do today, shown with live examples.

→

2 Build the fleet, live
Organize AI like a small team: each assistant gets a clear role, instructions and the right information.

Researcher · Sales · Manager · Reviewer

→

3 Put it to work
Watch the fleet work on real, everyday tasks, review the results together, and leave knowing how to do it yourself.

WHAT PARTICIPANTS LEAVE WITH

- At least five practical ways to use AI in their own life
- A clear, step-by-step picture of how to build their own AI fleet
- A plain-English way to check AI output before relying on it
- A simple method to keep using and improving it afterwards

WHO IT'S FOR

- Kids
- Young adults
- Professionals
- Business owners
- Families
- Anyone curious

AT A GLANCE

- 3 hours, in person at your center (not online)
- Up to 30 participants, kids to professionals
- No technical background needed
- Live demo on a big screen

WHY START EARLY

- **Time:** hand everyday tasks like planning, writing and research to AI.
- **Opportunity:** AI is becoming part of school and work; early learners adapt with confidence.
- **Good judgment:** know how AI works, spot its mistakes and the scams built on it.

FOR HOSTS

- You provide the room, a screen or projector, and Wi-Fi
- We provide the instructor and all workshop materials
- We plan the date and focus with you

Led by Tal
Entrepreneur, owner of two startups, 25 years of hands-on experience in the industry. Through ProActive Revenue, builds AI agent systems that run in production for Atlanta businesses.

INSIDE THE WORKSHOP · CURRICULUM

Watch an AI fleet come to life

Three in-person hours. Tal builds everything live on one computer, streamed to the big screen, while everyone watches and asks questions.

HOW AN AI FLEET IS BUILT

Five layers. You'll watch every one being built, live.

- **Results** — Plans, letters, research, posts
- **General Manager** — Assigns the work, checks quality
- **Specialist agents** — Researcher, Sales, Writer, Organizer
- **Your knowledge** — Your notes, documents, preferences
- **AI model** — The brain every agent runs on

MEET YOUR AI FLEET

Researcher Bot
Finds, compares and summarizes information, so you decide faster.

Sales Bot
Drafts outreach, follow-ups and posts that promote your work or event.

General Manager Bot
Hands out tasks, checks the results and keeps the team on track.

Plus Writer, Organizer and Reviewer bots

CURRICULUM · 3 HOURS

0:00 Welcome and why now
What you want AI to do for you, and why starting early pays off.

0:15 AI agents, demystified
Chatbot vs. agent, and what agents reliably do today. Live demo.

0:40 Meet your AI fleet
Researcher, Sales and General Manager bots: how roles turn AI into a team.

1:00 Building the first agent LIVE DEMO
Watch an agent get its role, clear instructions and the right information.

1:30 Break and Q&A
Questions about anything you have seen so far.

1:40 Assembling the fleet LIVE DEMO
The bots connected, with the General Manager checking the work.

2:10 Five use cases for your life LIVE DEMO
At least five practical uses, shown step by step so everyone can repeat them at home.

2:45 Safe, smart, sustainable
Check AI output, protect personal information, spot scams, keep a weekly routine.

USE CASES DEMONSTRATED (EXAMPLES)

- Plan a trip or family event
- Weekly meals and shopping list
- Job search and résumé
- Promote a small business
- Homework and study buddy
- Letters and difficult emails
- Compare before you buy
- Organize a community event
- Summarize long documents

HOSTING IS SIMPLE

1 Say hello
Reply by email or scan the code below. We talk for a few minutes about your members.

2 Pick a date and focus
We choose a date together and shape the examples around your community.

3 We run it at your center
You provide the room, screen and Wi-Fi. We bring the instructor and all materials.

Led by Tal
